

These insulating covers prevents contact between energized termination connections in high risk zones.

**TC-D01**

**TC-D02**

**TC-23-L**

Insulates connection points typically located near grounded support structures or bonded brackets, ensuring electrical safety and reliability

Designed to endure extreme high-intensity heat

Options for external back up fuse covers and termination covers for additional coverage/flexibility

Easy to install, provides a secure fit on conductor diameters up to 4.5" (11.4 cm)

UV resistant/weather resistant material is engineered to maintain performance in harsh/extreme conditions for the longevity

UL 94 V-0 flame retardant design

**TC-12-S**

**TC-12-BU**

**TC-23-L**

<b>SKU</b>	<b>Description</b>	<b>Height</b>	<b>Wire diameter</b>
TC-12-S	Small termination cover	12" (26cm)	.375"-1.7" (1cm-4.3cm)
TC-12-BU	Back up fuse cover	12" (30 cm)	.375"-1.5" (1cm-3.8cm)
TC-23-L	Extra large termination cover	23" (58 cm)	2.65-3" (6.7cm-7.6cm)

**Properties**

UL 94 Flammability of plastics

V-0
